

SJ CERT Monthly Net on 1.25m WA2IBM

Hi Amateur Radio Operators & SJNCERT Members,

The Almaden Radio Club (ARC) is generously allowing SJNCERT the use of their 1.25-meter WA2IBM repeater for a monthly CERT Net. See the table below for the frequency (224.100 MHz), offset and PL tones for their 1.25m repeater. (For ham radio newbies: The 1.25-meter band is also referred to as the "220" MHz band.)

The purpose of this CERT Net is to allow SJNCERT members throughout the City of San Jose who are licensed Amateur Radio Operators to test their radios and practice checking into the CERT Net for a public event or an actual emergency.

- The first CERT Net will be on:

Date: Sep. 11, 2023 (Monday)

Time: 6:30 PM

- All subsequent CERT Nets will be on the first Monday of the month at 6:30 PM.

The October net will be on:

Date: Oct. 2, 2023 (Monday)

Time: 6:30 PM

SJNCERT would like to acknowledge and thank the Almaden Radio Club Board of Directors for allowing us to use the 1.25m repeater. We would like to express our appreciation for the board's effort in supporting community safety.

Please join us for this CERT Net on the 1.25m WA2IBM repeater.

Remember to mark your calendar.

a. The first CERT Net will be on Sep. 11th (Mon.) at 6:30 PM

b. Subsequent CERT Nets will be on the first Monday of the month at 6:30 PM.

Thank you!

sjncert.org

The Almaden Radio Club also runs a "weekly" net every Monday at 7:00 PM. If you are able, please attend. During this weekly net, the ARC 144, 220 and 440 repeaters are all cross-linked; use the WA2IBM repeater of your choice.

Almaden Radio Club Repeaters

Frequency	Offset	CTCSS*	Callsign
145.190	-600 KHz	151.4 / 151.4 Hz	WA2IBM
224.100	-1.6 MHz	156.7 / 156.7 Hz	WA2IBM
441.150	+5.0 MHz	100.0 / 100.0 Hz	WA2IBM

* We suggest using encode / decode to reduce receive interference from other repeaters.
